

# Nearshoring and Application Management

proaxia's motto – value delivered as promised – is additionally reflected in our service portfolio for application management and software development (nearshoring). We offer you flexible solutions under attractive terms:

## Application management for your existing SAP® application landscape

proaxia offers an extensive portfolio structured along modular lines ideally suited to support your daily activities and save time. You decide the kind of support you need and receive a solution tailored to your needs.

- Product maintenance
- User support
- Incident resolution
- Planning and implementation of change requests
- Test preparation and support
- Transport arrangements
- System analysis, cleaning and tuning
- Application of patches
- System upgrading

## Development of customized SAP® extensions

We extend your SAP® standard solutions and integrate third-party software components to meet your requirements. In doing so we use standardized SAP development tools and the most advanced technologies such as SAP Fiori® or SAP Cloud applications.

Our experienced developer team provides the following services:

- **Extension** of SAP standard functionalities or development of entire customized applications for your SAP on-premise or SAP Cloud applications
- **Integration** of applications developed by third-party providers via interfaces, portals or Cloud integration
- Creation of extended analyses, reports and forms in the **business intelligence context**
- Extension of existing SAP Fiori® apps or creation of customized **SAP Fiori® applications**
- Development of **mobile business solutions** with SAP back-end integration for all smartphones and tablets as native solutions, container solutions or HTML5 browser apps

## Our vision

- Client manager as single point of contact
- On-site and remote services ensuring optimum cost-effectiveness
- Proven methodology
- Professional infrastructure
- Customer care provided by experienced consultants or developers in your language
- Service Level Agreements (SLAs) including monthly reporting for the services
- Flexible contract design

## Your benefits

Pooling our development capacities at our site in Poland lets you profit from these benefits:

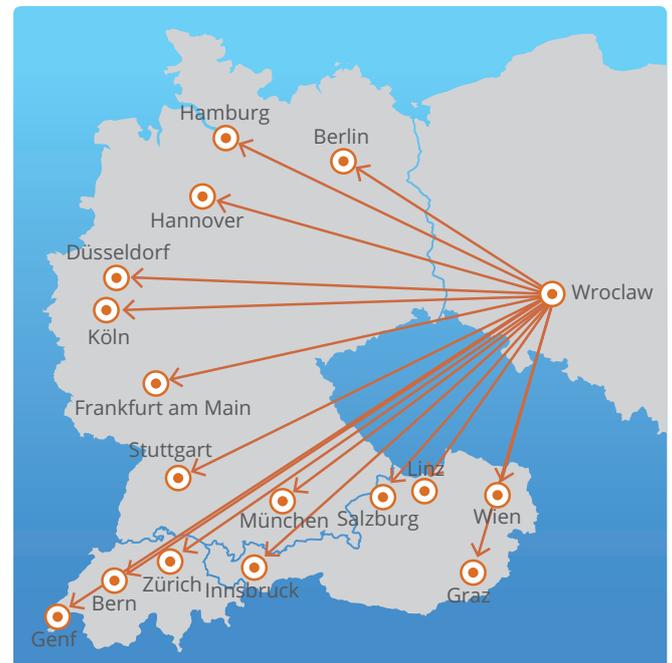

- Nearshoring in EU countries
- Identical time zone
- Same cultural area
- Communication in German and English
- Flexibility and scalability – on site and remote (2 hours by air)
- Proven methods and procedural model
- Attractive TCO (total cost of ownership)
